There are now in Chicago, wot less than 40.000 proclayer Jets. not less than 40,000 pro-slavery Irish.

They hold nearly a monopoly of several branches of labor, and are paid high wages for their work. But if their anti-free-negro principles were carried out, and slavery introduced into Chlcago, more than 20,000 of this number would be thrown out of semilerment and left to teach the form of the beyoner. Then Irish aminosity to the negro would cease, then there would be no more Irish mobe to murder or rob them or burn their houses or orphan saylums. But having their principles thus reduced to practice, wherein would the Irish be benealted thereby?

If any free hegro-inting Call reads this article, we desire him to peause at this point and answer our question, for it is one of immense importance to himself. Let us suppose that Calcago is converted into a slave-holding city, and every free negro is reduced to servitude. How would that help the Irish? How would that improve their material, social or potitical condition? In a short time eyery rich man would own slaves. The Irish girls now amployed in all the wealthy families would be discharged, and negresses substituted. Would that benefit the Irish population? All the leading whole sale houses would purchase negro draymen.

The meeting was enthusiastic throughout, and closed by adopting a series of patriotic resolutions, endorsing the Administration and the Union, and demanding a vigorous procethe Union, and demanting a vigorous processition of the war. Sixilar meetings are being held all over the fitate. The fire on the prairie is rekindled and spreading. Copperheadism is in its last agos les.

LOANIES THE SCHOOL FUND.

The Superintendent of Public Instruction, Mr. John T. Brooks, has published a circular advising and recommending the Township Treasurers to loan all school moneys in their hands of any rate per cent, not less than eir or more than ten. It appears that the act of the Legislature fixes the rate at ten per cent. But Mr. Brooks considers this as only the maximum rate, and that the money may be lossed at any rate not less than air nor more than ten per cent. The Legislature at its last cension endeavored to frame as act to enable the moneys to be lossed at the rates recommended by Mr. Brooks, but it falled in the Sanate, on account of the opposition of some of the members, I believe of Mr. Brooks own parly. The latter now tries to throw the blame upon the Governor on account of his prorogation. But like all bosh the set might have been.

In the opinion of our informant, the time for deinding the people by boastful claims of Confederate victories, is past. It is hard to make them bethere the reports which are daily directained by the newspaper press, of victories schiened by Southern arms. So long as Vicksburg held out, there was hops, for they regarded it as impregnable; yet when the news of its full became known, the people to one of the full became known, the people at once gave up all hope of final success. The men are carnestly arrilous that the United Strees should make come proposals of peace, on the basis of a restoration of the Union, Nor will they be guided by the opinion, views, or festings of those who have led that coming reservance to man or heast. But the old creature has tasted shoat enough of the waters of bitterness, and there are many evidences that she is more humbled than any fitate has yet been.

There are two theories in regard to the movements of Johnston's army. One is that it is at Schma, Alabamas, and that Johnston intends to occupy that as a new base of operations; and the other is, that it has gone to Mobile to assist in the defense of that city, against an attack which it is generally apprehended by the rebels will soon be made. I now rather incline to the former thaory, Solma is a base from which Johnston could keep open and defend the Mobile and Ohio rallread as high up as Meridian, in the extreme western part of Georgia. Selms is on the Aisbama River, which from that place runs nearly east to Monizonney. He is undoubtedly operating in that region somewhers.

Grant's object was known morths before. The configuous to say nothing of the stores loat at Jackson's country shounded in supplies. Why not six mouths instead of forty days' rations? And why, above all, as Fembetion must have known the olly 30,000 me somissionals, tid he crowd to his one of the configuration of the colly 30,000 me somissionals, tid he crowd to waits for defines, not for in excess of its waste for defines, not for in teres of the waste for defines, not for six the cast supplies, or become food for power to the cast supplies, or become food for power to the cast supplies, or become food for power to the cast supplies, or become food for power to the cast supplies, or become food for power to the food for a supplies, and forth, who had evidently prestrated Pemberton's want of providence made the endurance rather than the bravery of the garrison taxed. When defeated, he should have retreated on the open country, for the above and other ressons. for it is now absolutely cortain that by not doing so he not only destroyed all hope of resons from Johnston, but also prelepitated the fall of Vicksburg by the superserviceable troops he threw into it. The Government had thought Peraberton's force sufficient, and hence Johnston was sent, with no force of his own, beyond 3,000 or 3,000 men, but to take charge of Pemberton's force sufficient, and hence Johnston was sent, with no force of his own, beyond 3,000 or 3,000 men, but to take charge of Pemberton's army in consequence of the sarm Government at the last moment began to fire about his imputed unpopularity and hecomplexey. To create a new army of 25,000 men, from an enhanced country, and weak as well as distant points—upon the spur of the occasion, was evel, more than could have expensed more reclarances. Upon these fact the judgment of he counted to the first of the counted of
